

ESSA-QUALIFYING EFFICACY RESEARCH

Zearn Math Quasi-Experimental Efficacy Study

Prepared for the Louisiana Department of Education

This research is designed to meet the rigorous standards set by the What Works Clearinghouse (WWC) and qualify as an Every Student Succeeds Act (ESSA) evidence-based intervention.

Zearn in Louisiana

LDOE partnered with Zearn to provide systems with K-8 math support as part of Math Refresh initiative

280,000 Louisiana K-8 students across 100 parishes and CMOs engaged with Zearn Math during 2023-24

Used flexibly as a complement to core math instruction as well as intervention, tutoring, and summer programs

Key findings

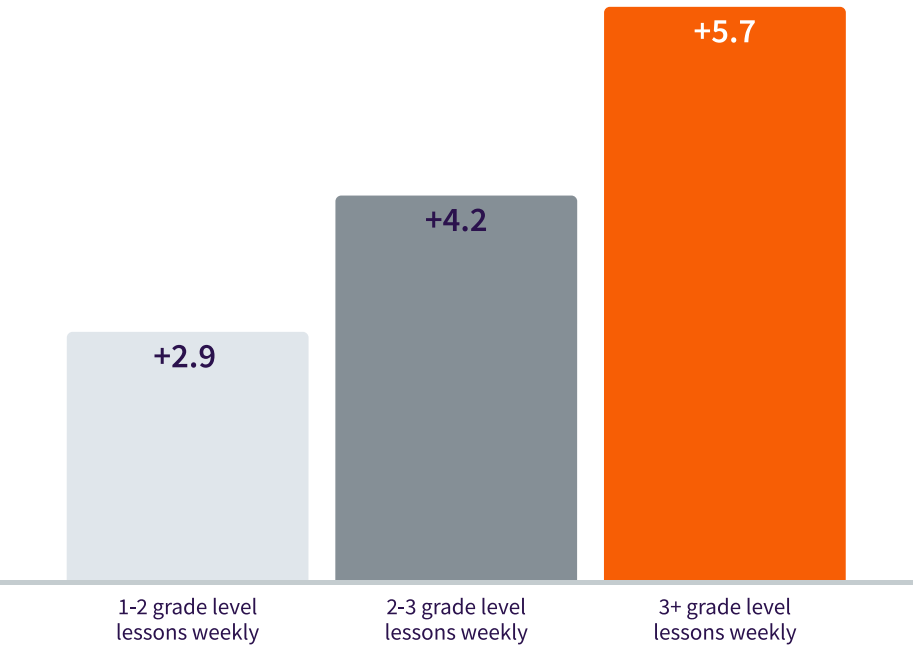

To analyze the impact of Zearn Math on Louisiana student achievement, researchers used a quasi-experimental research method to measure LEAP math performance growth differences between students who used Zearn Math consistently and a matched comparison group that did not use Zearn. Drawing from a sample of 36,000 Louisiana students, the study analyzes performance for the 2021-22 and 2022-23 academic years. Matched students had similar starting math and reading language arts scores and have similar student characteristics across academic and demographic factors. For more information on the research methodology used, please see the [technical appendix](#).

Building on previous studies of Zearn Math efficacy in Louisiana, this two-year study found that consistent Zearn usage increases math scale scores, with the most substantial gains observed in students who completed 3+ grade-level lessons each week.

 KEY FINDING 1

While the most substantial gains are observed in students who completed 3+ Zearn lessons each week, any Zearn dosage contributes to LEAP scale score growth.

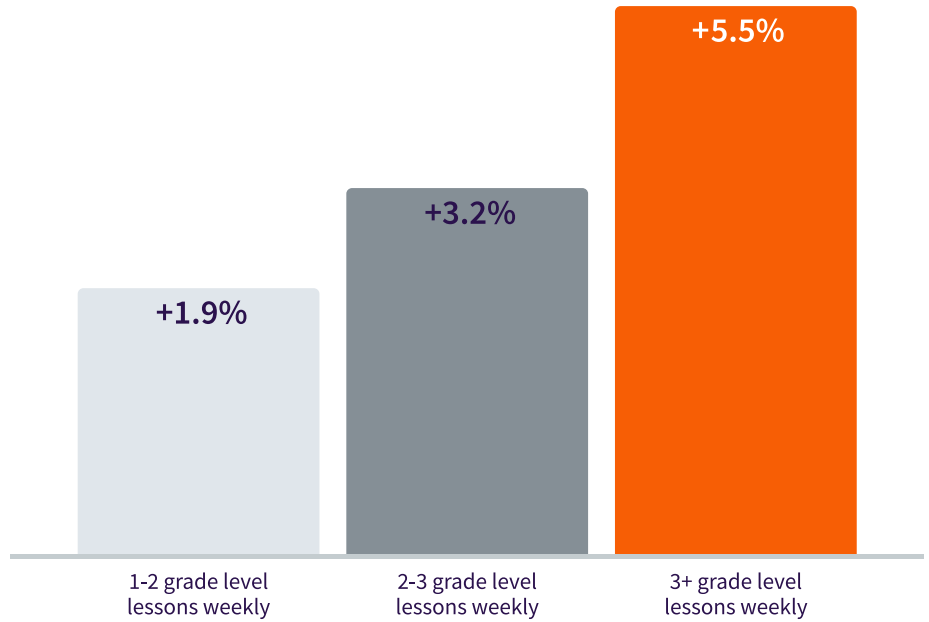

Impact of Zearn Math on LEAP Scale scores, by Zearn Dosage

KEY FINDING 2

Impact of Zearn Math on Percent of Students Placing at Mastery or Above on the LEAP, by Zearn Dosage

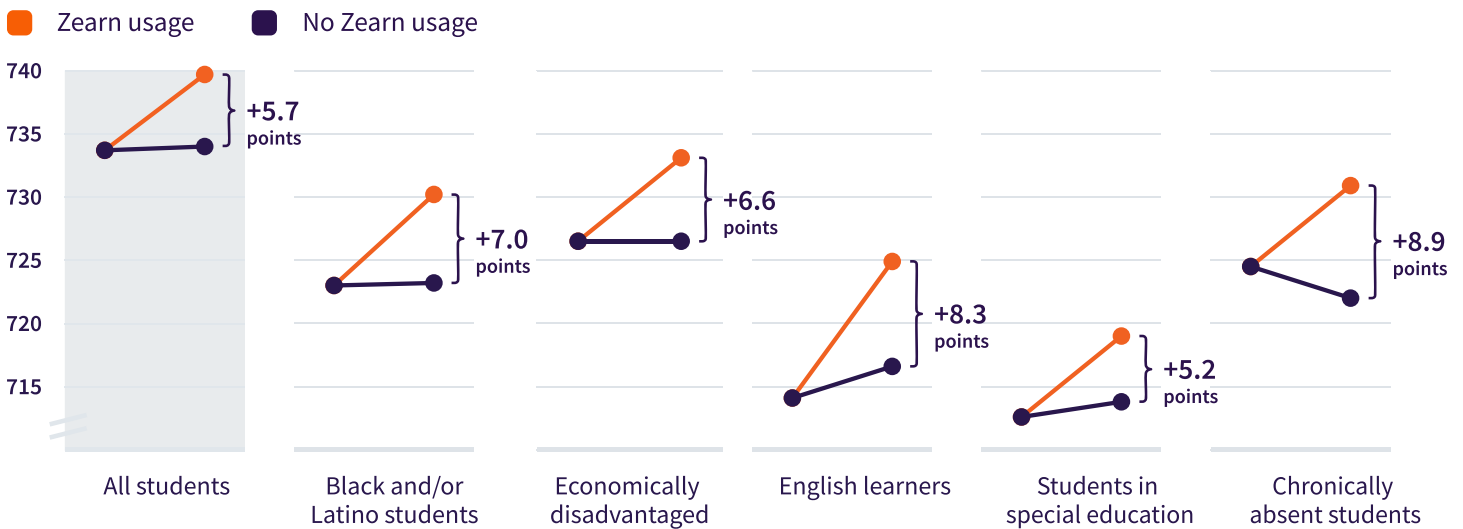

The same is true with regards to the rate of students placing at Mastery or Above: Zearn usage at any dosage leads to growth, with increasing effects at higher dosage levels.

KEY FINDING 3

Consistent Zearn usage resulted in a 6-point increase in LEAP math scores, with notable gains across subgroups.

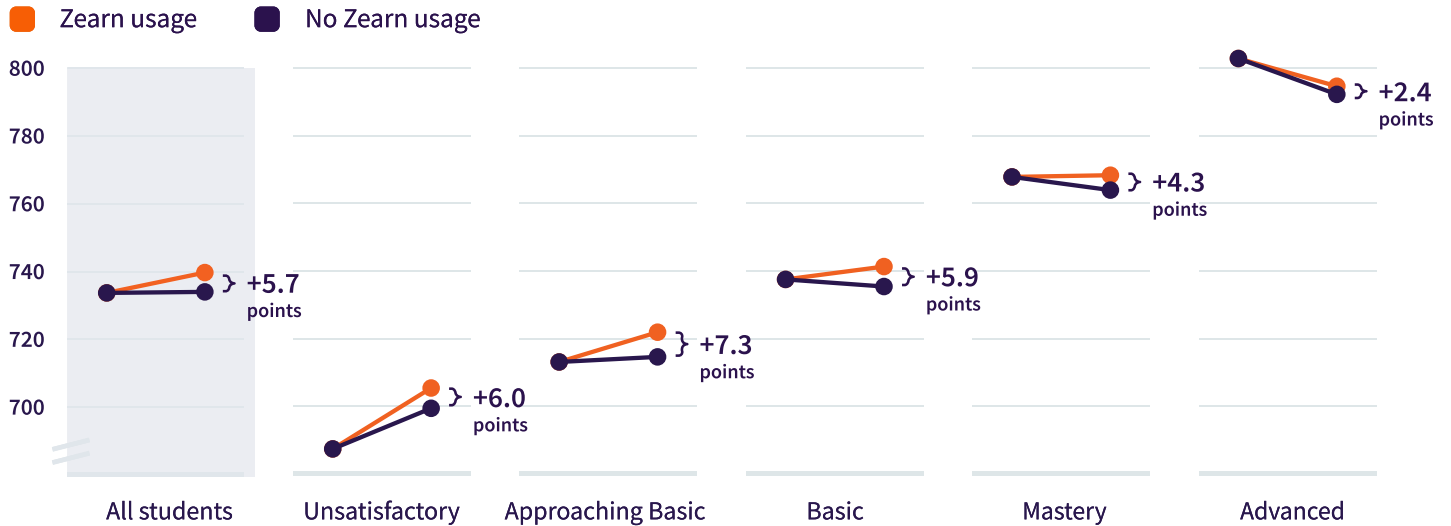

Impact of Zearn Math on LEAP Scale Scores by Student Subgroup

KEY FINDING 4

Consistent Zearn usage resulted in greater scale score growth across all starting LEAP Achievement Levels.

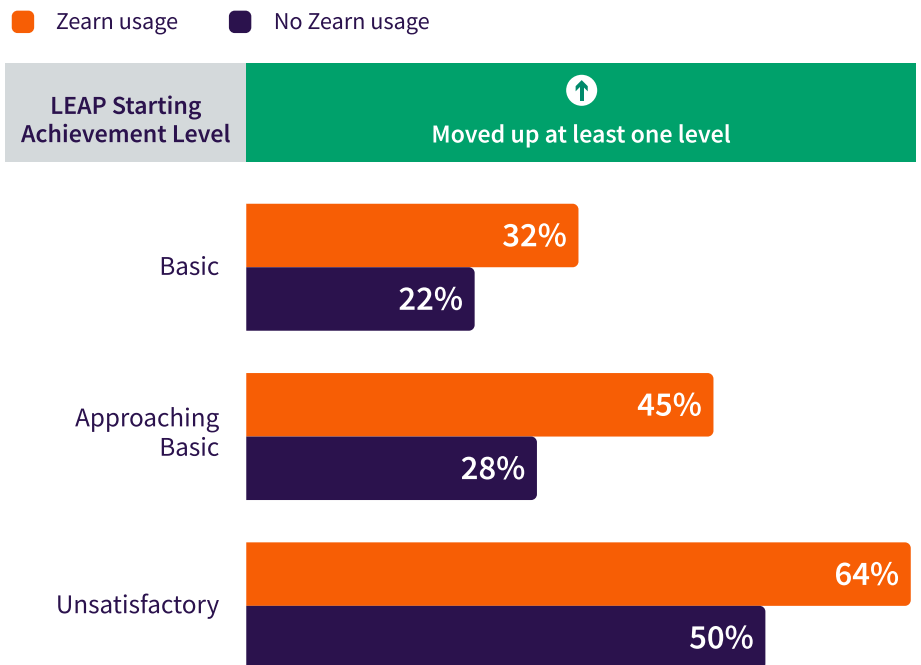

Impact of Zearn Math on LEAP Scale Scores by Starting Achievement Level

KEY FINDING 5

Zearn usage improves LEAP Achievement Level; 64% of the lowest-scoring students moved up at least one Level.

Student Mobility by Starting Achievement Level

Zearn is the 501(c)(3) nonprofit educational organization behind Zearn Math, the top-rated math learning platform used by 1 in 4 elementary-school and 1 million middle-school students nationwide. Everything we do is driven by the belief that every kid is a math kid. Learn more at about.zearn.org.
