

ESSA-QUALIFYING EFFICACY RESEARCH

# Zearn Math Quasi-Experimental Efficacy Study

Prepared for the Texas Education Agency

This research is designed to meet the rigorous standards set by the What Works Clearinghouse (WWC) and qualify as an Every Student Succeeds Act (ESSA) evidence-based intervention.

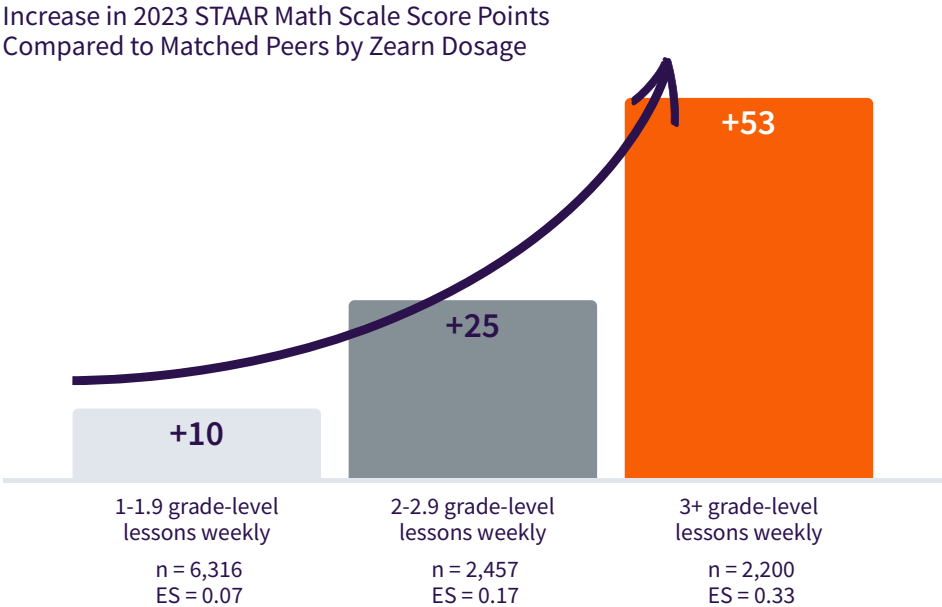

Key findings

This study examines the impact of consistent Zearn Math usage, defined as completing 1 or more lessons each week of the school year, on Texas STAAR math scores for grades 4-6 students who used Zearn consistently and a matched comparison group that did not use Zearn. Using a treatment-on-the-treated design, researchers compared 11,000 consistent Zearn Math users to a matched group of 11,000 non-users. The treatment group was segmented by usage levels: 1-1.9, 2-2.9, and 3+ (fidelity usage) grade-level lessons per week. Students were matched on 2022 STAAR ELA and math scores, as well as demographic factors, to isolate the effect of Zearn usage.

Researchers found that consistent Zearn Math usage led to significant increases in STAAR math scores, with the highest gains observed when Zearn Math is used with fidelity (3+ grade-level lessons per week). Fidelity Zearn Math usage increases STAAR math scale scores by 53 points on average, with gains across subgroups. Further, Zearn usage increased STAAR performance level; 62% of the lowest scoring students moved up at least one level when using the platform consistently.

KEY FINDING 1

At any dosage, Zearn increases math scale scores; fidelity Zearn Math users had significant increases in STAAR math scale scores of 53 points on average.

I have been using Zearn and it has completely changed the way I teach. Implementing this program has truly benefited my students.  
5TH GRADE BILINGUAL TEACHER, JUDSON ISD

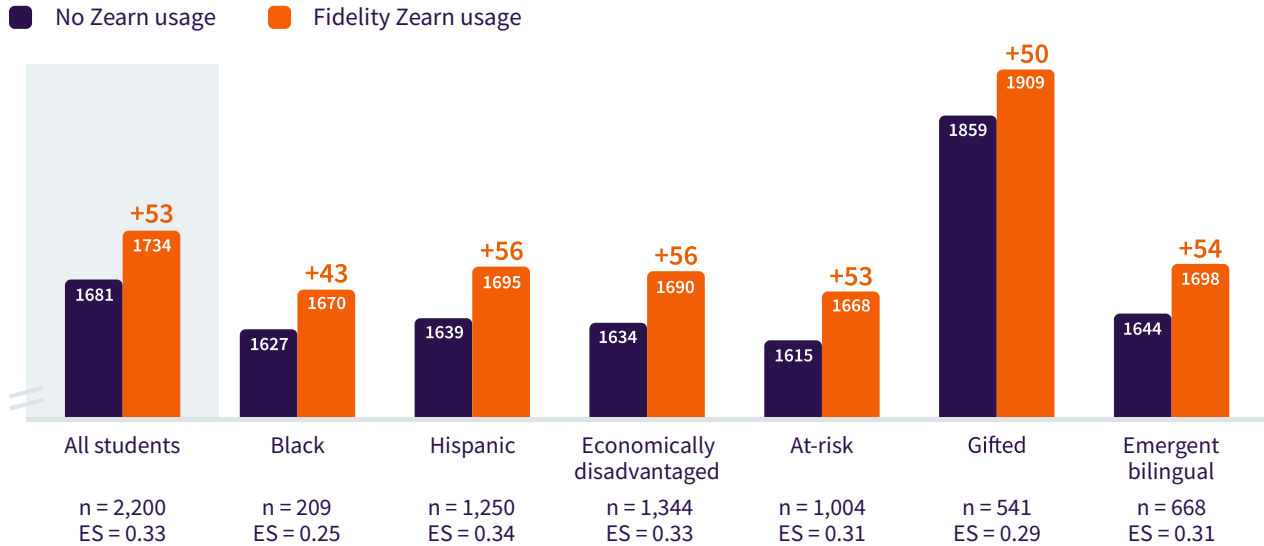

Collaborative for Student Success, a national nonprofit, spotlighted Judson Independent School District’s usage of evidence-based resources, tools, and programs to accelerate outcomes for students.

## KEY FINDING 2

### Across sub-groups, Zearn usage resulted in significant increases in STAAR Math scale scores.

Impact of Fidelity Zearn Math Usage on Spring 2023 STAAR Math Scale Scores by Subgroup

## KEY FINDING 3

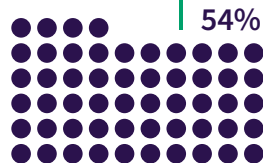

Zearn usage improves STAAR performance level; 62% of the lowest-scoring students moved up at least one level.

Impact of Zearn Math for Students Scoring at the Lowest Performance Level on 2023 STAAR

No Zearn usage

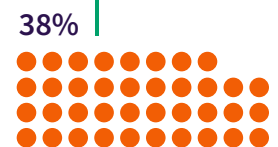

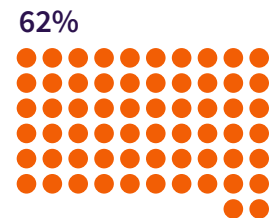

Moved up at least one math performance level

Stayed at lowest math performance level

Fidelity Zearn usage

Zearn is the 501(c)(3) nonprofit educational organization behind Zearn Math, the top-rated math learning platform used by 1 in 4 elementary-school and 1 million middle-school students nationwide. Everything we do is driven by the belief that every kid is a math kid.
