

Getting Started with Zearn Math

A checklist for educators

1 Get to know Zearn

- ☐ Attend training; if helpful, explore additional resources to support your implementation [here](#).
- ☐ Engage in a few Digital Lessons from your grade level. Learn more [here](#).
- ☐ Orient yourself to the data in your [Zearn Reports](#).
- ☐ Align with your principal and team on where Zearn fits in your daily schedule.

2 Prepare your account

- ☐ Login and familiarize yourself with your educator account.
- ☐ Review your class list on the “Roster” tab to ensure they are accurate.
- ☐ [Set the assignment](#) for the students you work with.

3 Get the materials ready

- ☐ Make sure students have login information. Print [student login cards](#) if your school does not use Clever or Classlink.
- ☐ Ensure each student has access to resources such as a device, pencil, headphones, and internet.
- ☐ Make sure you have instructional materials on hand (e.g. Zearn Workbooks, printed [Student Notes](#)).

4 Engage your students

- ☐ Orient students to the [flow of a digital lesson](#) by completing 2-3 Digital Lessons as a whole class.
- ☐ Model getting questions wrong and discuss the importance of making and learning from mistakes.
- ☐ Model using paper Student Notes during the Digital Lesson and persevering through parts that might be more challenging.

5 Establish classroom systems and routines

- ☐ Enact systems and routines to celebrate Digital Lesson engagement. See our [anchor charts and ideas](#).
- ☐ Set goals with students to encourage perseverance through struggle. See our [goal trackers and ideas](#).
- ☐ Use the [Class Snapshot](#) weekly to check on Zearn sign-ins, time, and lesson completion. Use LiveView while students are learning with Zearn to check in on student activity and step in to support students when needed.

6 Share Zearn with families

- ☐ [Explore family engagement resources](#) to introduce students’ families to Zearn and help them support their child’s math learning.
