

Zearn Time Look-Fors Guide for Leaders

This guide highlights observable classroom practices that support strong implementation during Zearn Time.

Before Visiting Classrooms

Before visiting each classroom, leaders may review the [Admin Snapshot](#) for an overview of classroom usage. Leaders should look for:

- ☐ **Student Sign-Ins** – students consistently signing in and engaging with Zearn each week.
- ☐ **Teacher Sign-Ins** – teachers regularly signing in and reviewing implementation data.
- ☐ **Weekly Minutes** – students reaching at least 90 minutes of Zearn each week.
- ☐ **Weekly Lessons Completed** – students completing approximately 3 grade-level Digital Lessons each week and making steady progress toward 90 grade-level Digital Lessons across the year.

Independent Digital Lesson

When you observe [Independent Digital Lessons](#), we recommend looking for:

- ☐ Students wearing headphones to hear the personalized instruction in each Independent Digital Lesson.
- ☐ Students independently completing Digital Lessons, not as a whole group or in pairs.
- ☐ Students engaging with pencil-to-paper Student Notes.
- ☐ Students persevering through challenging moments by using the built-in supports within Digital Lessons.

Classroom Systems and Routines

When you observe implementation, we recommend looking for:

- ☐ Routines that help students efficiently transition to or from Digital Lessons with all of their materials.
- ☐ Systems that support completing—and correcting!—[Student Notes](#) while working through Independent Digital Lessons.
- ☐ Routines that support students in productively persevering through challenges and using available supports during Digital Lessons.
- ☐ Systems for tracking lesson completion goals and celebrating student effort, both individually and as a class.

Using Class Reports to Support Students

When you observe how teachers use class reports to support students, we recommend looking for:

- ☐ Systems to support weekly goal tracking for Independent Digital Lessons.
- ☐ Students engaging with [Digital Bonuses](#) once they have met their weekly goal.
- ☐ Teachers using LiveView to monitor student learning during Zearn time and identify students who may need support.

Observation Notes
