

Helping All Students Access Grade-Level Math: Using Zearn with Eureka Math K-8

Zearn is a digital learning platform designed to support all students in building a deep, lasting understanding of grade-level math. This guide shows how Zearn works alongside Eureka Math to help every student succeed.

About Zearn: A Daily, Coherent Companion to Your Core Math Curriculum

Zearn is designed to work alongside your core math curriculum every day — reinforcing key ideas through a research-grounded learning progression. Zearn's digital lessons complement and strengthen what you're already teaching, giving every student more opportunities to explore, persevere, and break through in grade-level math.

When learning with Zearn, students:

- Develop both procedural fluency and conceptual understanding, strengthening automaticity with math facts while deepening their grasp of key mathematical ideas.
- Engage with math through a Concrete–Representational–Abstract (CRA) progression, moving from objects and visual models to symbols and equations.
- Receive just-in-time, embedded support that helps them work through challenges while maintaining grade-level rigor.

Key Steps to Effective Zearn Usage

Within each grade, Zearn's digital content is organized into units — called Missions. Each Zearn Mission focuses on a related set of grade-level math ideas, with lessons intentionally sequenced to build and deepen understanding. Students get the most out of Zearn when their Mission is connected to the concepts they are currently studying in class.

To use Zearn effectively, assign the Mission identified in this guide for your current unit and let students progress through the Mission lesson by lesson, in order, at their own pace. The goal is for students to complete at least three grade-level lessons per week, or 90 over the course of the year. The steps below outline how to put this into practice.

1. At the start of a new unit, assign students to the first lesson of the recommended Mission and let them progress at their own pace — no daily reassignment needed.

2. Set a goal for students to complete three grade-level lessons each week. Protect about 90 minutes of weekly instructional time to make this achievable.

3. Monitor progress during Zearn time and across the week using real-time reports. Use the data to identify students on track to complete three grade-level lessons per week and those who may need additional support.

4. Support and celebrate students by recognizing progress toward weekly goals and providing additional support to help every student continue moving forward.

Kindergarten Learning progression

This table shows the recommended Zearn Mission for each Eureka Math Module. Refer to it each time you begin a new Module to determine which Mission to assign.

Assign students to the first lesson of the recommended Mission and allow them to progress at their own pace. Because assignments are made at the Mission level, all students stay focused on the same grade-level concepts, even as they move through lessons at different speeds. When your class begins a new Module, assign the next recommended Mission to all students, even if some have not finished their current Mission. Each Mission includes built-in supports that give every student access to new content while staying connected to grade-level learning.

Eureka Math	Zearn Math Supporting Digital Content
Module 1: Numbers to 10 (37 lessons)	Mission 1: Numbers to 10 (30 lessons)
Module 2: Two-Dimensional and Three-Dimensional Shapes (10 lessons)	Mission 2: Two-Dimensional and Three-Dimensional Shapes (8 lessons)
Module 3: Comparison of Length, Weight, Capacity, and Numbers to 10 (32 lessons)	Mission 3: Comparison of Length, Weight, Capacity, and Numbers to 10 (25 lessons)
Module 4: Number Pairs, Addition and Subtraction to 10 (41 lessons)	Mission 4: Number Pairs, Addition and Subtraction to 10 (33 lessons)
Module 5: Numbers 10–20 and Counting to 100 (24 lessons)	Mission 5: Numbers 10-20 and Counting to 100 (19 lessons)
Module 6: Analyzing, Comparing, and Composing Shapes (8 lessons)	Mission 6: Analyzing, Comparing, and Composing Shapes (6 lessons)

Grade 1 Learning progression

This table shows the recommended Zearn Mission for each Eureka Math Module. Refer to it each time you begin a new Module to determine which Mission to assign.

Assign students to the first lesson of the recommended Mission and allow them to progress at their own pace. Because assignments are made at the Mission level, all students stay focused on the same grade-level concepts, even as they move through lessons at different speeds. When your class begins a new Module, assign the next recommended Mission to all students, even if some have not finished their current Mission. Each Mission includes built-in supports that give every student access to new content while staying connected to grade-level learning.

Eureka Math	Zearn Math Supporting Digital Content
Module 1: Sums and Differences to 10 (39 lessons)	Mission 1: Add and Subtract Small Numbers (32 lessons)
Module 2: Introduction to Place Value Through Addition and Subtraction Within 20 (29 lessons)	Mission 2: Meet Place Value (23 lessons)
Module 3: Ordering and Comparing Length Measurements as Numbers (13 lessons)	Mission 3: Measure Length (10 lessons)
Module 4: Place Value, Comparison, Addition and Subtraction to 40 (29 lessons)	Mission 4: Add and Subtract Big Numbers (23 lessons)
Module 5: Identifying, Composing, and Partitioning Shapes (13 lessons)	Mission 5: Work with Shapes (13 lessons)
Module 6: Place Value, Comparison, Addition and Subtraction to 100 (30 lessons)	Mission 6: Add and Subtract to 100 (18 lessons)

Grade 2 Learning progression

This table shows the recommended Zearn Mission for each Eureka Math Module. Refer to it each time you begin a new Module to determine which Mission to assign.

Assign students to the first lesson of the recommended Mission and allow them to progress at their own pace. Because assignments are made at the Mission level, all students stay focused on the same grade-level concepts, even as they move through lessons at different speeds. When your class begins a new Module, assign the next recommended Mission to all students, even if some have not finished their current Mission. Each Mission includes built-in supports that give every student access to new content while staying connected to grade-level learning.

Eureka Math	Zearn Math Supporting Digital Content
Module 1: Sums and Differences to 100 (8 lessons)	Mission 1: Add and Subtract Friendly Numbers (8 lessons)
Module 2: Addition and Subtraction of Length Units (10 lessons)	Mission 2: Explore Length (10 lessons)
Module 3: Place Value, Counting, and Comparison of Numbers to 1,000 (21 lessons)	Mission 3: Counting and Place Value (19 lessons)
Module 4: Addition and Subtraction Within 200 with Word Problems to 100 (31 lessons)	Mission 4: Add, Subtract, and Solve (29 lessons)
Module 5: Addition and Subtraction Within 1,000 with Word Problems to 100 (20 lessons)	Mission 5: Add and Subtract Big Numbers (20 lessons)
Module 6: Foundations of Multiplication and Division (20 lessons)	Mission 6: Equal Groups (16 lessons)
Module 7: Problem Solving with Length, Money, and Data (26 lessons)	Mission 7: Length, Money, and Data (19 lessons)

Module 8: Time, Shapes, and Fractions as Equal Parts of Shapes
(16 lessons)

Mission 8: Shapes, Time, and Fractions
(12 lessons)

Grade 3 Learning progression

This table shows the recommended Zearn Mission for each Eureka Math Module. Refer to it each time you begin a new Module to determine which Mission to assign.

Assign students to the first lesson of the recommended Mission and allow them to progress at their own pace. Because assignments are made at the Mission level, all students stay focused on the same grade-level concepts, even as they move through lessons at different speeds. When your class begins a new Module, assign the next recommended Mission to all students, even if some have not finished their current Mission. Each Mission includes built-in supports that give every student access to new content while staying connected to grade-level learning.

Eureka Math	Zearn Math Supporting Digital Content
Module 1: Properties of Multiplication and Division and Solving Problems with Units of 2–5 and 10 (21 lessons)	Mission 1: Multiply and Divide Friendly Numbers (21 lessons)
Module 2: Place Value and Problem Solving with Units of Measure (21 lessons)	Mission 2: Measure It (21 lessons)
Module 3: Multiplication and Division with Units of 0, 1, 6–9, and Multiples of 10 (21 lessons)	Mission 3: Multiply and Divide Tricky Numbers (21 lessons)
Module 4: Multiplication and Area (16 lessons)	Mission 4: Find the Area (16 lessons)
Module 5: Fractions as Numbers on the Number Line (30 lessons)	Mission 5: Fractions as Numbers (29 lessons)
Module 6: Collecting and Displaying Data (9 lessons)	Mission 6: Display Data (9 lessons)
Module 7: Geometry and Measurement Word Problems (34 lessons)	Mission 7: Shapes and Measurement (19 lessons)

Grade 4 Learning progression

This table shows the recommended Zearn Mission for each Eureka Math Module. Refer to it each time you begin a new Module to determine which Mission to assign.

Assign students to the first lesson of the recommended Mission and allow them to progress at their own pace. Because assignments are made at the Mission level, all students stay focused on the same grade-level concepts, even as they move through lessons at different speeds. When your class begins a new Module, assign the next recommended Mission to all students, even if some have not finished their current Mission. Each Mission includes built-in supports that give every student access to new content while staying connected to grade-level learning.

Eureka Math	Zearn Math Supporting Digital Content
Module 1: Place Value, Rounding, and Algorithms for Addition and Subtraction (19 lessons)	Mission 1: Add, Subtract, and Round (18 lessons)
Module 2: Unit Conversions and Problem Solving with Metric Measurement (5 lessons)	Mission 2: Measure and Solve (5 lessons)
Module 3: Multi-Digit Multiplication and Division (38 lessons)	Mission 3: Multiply and Divide Big Numbers (34 lessons)
Module 4: Angle Measure and Plane Figures (16 lessons)	Mission 4: Construct Lines, Angles, and Shapes (14 lessons)
Module 5: Fraction Equivalence, Ordering, and Operations (41 lessons)	Mission 5: Equivalent Fractions (38 lessons)
Module 6: Decimal Fractions (16 lessons)	Mission 6: Decimal Fractions (15 lessons)
Module 7: Exploring Measurement with Multiplication (18 lessons)	Mission 7: Multiply and Measure (12 lessons)

Grade 5 Learning progression

This table shows the recommended Zearn Mission for each Eureka Math Module. Refer to it each time you begin a new Module to determine which Mission to assign.

Assign students to the first lesson of the recommended Mission and allow them to progress at their own pace. Because assignments are made at the Mission level, all students stay focused on the same grade-level concepts, even as they move through lessons at different speeds. When your class begins a new Module, assign the next recommended Mission to all students, even if some have not finished their current Mission. Each Mission includes built-in supports that give every student access to new content while staying connected to grade-level learning.

Eureka Math	Zearn Math Supporting Digital Content
Module 1: Place Value and Decimal Fractions (16 lessons)	Mission 1: Place Value with Decimal Fractions (16 lessons)
Module 2: Multi-Digit Whole Number and Decimal Fraction Operations (29 lessons)	Mission 2: Base Ten Operations (29 lessons)
Module 3: Addition and Subtraction of Fractions (16 lessons)	Mission 3: Add and Subtract Fractions (16 lessons)
Module 4: Multiplication and Division of Fractions and Decimal Fractions (33 lessons)	Mission 4: Multiply and Divide Fractions and Decimals (32 lessons)
Module 5: Addition and Multiplication with Volume and Area (21 lessons)	Mission 5: Volume, Area, and Shapes (19 lessons)
Module 6: Problem Solving with the Coordinate Plane (34 lessons)	Mission 6: The Coordinate Plane (24 lessons)

Grade 6 Learning progression

This table shows the recommended Zearn Mission for each Eureka Math Module. Refer to it each time you begin a new Module to determine which Mission to assign.

Assign students to the first lesson of the recommended Mission and allow them to progress at their own pace. Because assignments are made at the Mission level, all students stay focused on the same grade-level concepts, even as they move through lessons at different speeds. When your class begins a new Module, assign the next recommended Mission to all students, even if some have not finished their current Mission. Each Mission includes built-in supports that give every student access to new content while staying connected to grade-level learning.

Eureka Math	Zearn Math Supporting Digital Content
Module 1: Ratios and Unit Rates (29 lessons)	Mission 2: Introducing Ratios (16 lessons) Mission 3: Unit Rates and Percentages (14 lessons) <i>Note: When students complete Zearn Mission 2, they will automatically progress to Zearn Mission 3—no additional action is needed.</i>
Module 2: Arithmetic Operations Including Division of Fractions (19 lessons)	Mission 4: Dividing Fractions (16 lessons) Mission 5: Arithmetic in Base Ten (14 lessons) <i>Note: When students complete Zearn Mission 4, they will automatically progress to Zearn Mission 5—no additional action is needed.</i>
Module 3: Rational Numbers (19 lessons)	Mission 7: Rational Numbers (18 lessons)
Module 4: Expressions and Equations (34 lessons)	Mission 6: Expressions and Equations (16 lessons)
Module 5: Area, Surface Area, and Volume Problems (19 lessons)	Mission 1: Area and Surface Area (17 lessons)
Module 6: Statistics (22 lessons)	Mission 8: Data Sets and Distributions (17 lessons)

Grade 7 Learning progression

This table shows the recommended Zearn Mission for each Eureka Math Module. Refer to it each time you begin a new Module to determine which Mission to assign.

Assign students to the first lesson of the recommended Mission and allow them to progress at their own pace. Because assignments are made at the Mission level, all students stay focused on the same grade-level concepts, even as they move through lessons at different speeds. When your class begins a new Module, assign the next recommended Mission to all students, even if some have not finished their current Mission. Each Mission includes built-in supports that give every student access to new content while staying connected to grade-level learning.

Eureka Math	Zearn Math Supporting Digital Content
Module 1: Ratios and Proportional Relationships (22 lessons)	Mission 1: Scale Drawings (9 lessons) Mission 2: Introducing Proportional Relationships (14 lessons) <i>Zearn Tip: When students complete Zearn Mission 1, they will automatically progress to Zearn Mission 2—no additional action is needed. Midway through Eureka Math Module 1, assign any students still on Zearn Mission 1 to Mission 2 so they can continue to progress with the class.</i>
Module 2: Rational Numbers (23 lessons)	Mission 5: Rational Number Arithmetic (14 lessons)
Module 3: Expressions and Equations (26 lessons)	Mission 6: Expressions, Equations, and Inequalities (22 lessons)
Module 4: Percent and Proportional Relationships (18 lessons)	Mission 4: Proportional Relationships and Percentages (14 lessons)
Module 5: Statistics and Probability (23 lessons)	Mission 8: Probability and Sampling (17 lessons)
Module 6: Geometry (27 lessons)	Mission 7: Angles, Triangles, and Prisms (14 lessons) Mission 3: Measuring Circles (9 lessons) <i>Zearn Tip: When students complete Zearn Mission 7, assign them to Zearn Mission 3. Midway through Eureka Math Module 4, assign any students still on Zearn Mission 7 to Mission 3 so they can continue to progress with the class.</i>

Grade 8 Learning progression

This table shows the recommended Zearn Mission for each Eureka Math Module. Refer to it each time you begin a new Module to determine which Mission to assign.

Assign students to the first lesson of the recommended Mission and allow them to progress at their own pace. Because assignments are made at the Mission level, all students stay focused on the same grade-level concepts, even as they move through lessons at different speeds. When your class begins a new Module, assign the next recommended Mission to all students, even if some have not finished their current Mission. Each Mission includes built-in supports that give every student access to new content while staying connected to grade-level learning.

Eureka Math	Zearn Math Supporting Digital Content
Module 1: Integer Exponents and Scientific Notation (13 lessons)	Mission 7: Exponents and Scientific Notation (15 lessons)
Module 2: The Concept of Congruence (16 lessons)	Mission 1: Rigid Transformations and Congruence (14 lessons)
Module 3: Similarity (14 lessons)	Mission 2: Dilations, Similarity, and Introducing Slope (12 lessons)
Module 4: Linear Equations (31 lessons)	Mission 3: Linear relationships (13 lessons) Mission 4: Linear Equations and Linear Systems (14 lessons) <i>Zearn Tip: When students complete Zearn Mission 3, they will automatically progress to Zearn Mission 4—no additional action is needed. Midway through Eureka Math Module 4, assign any students still on Zearn Mission 3 to Mission 4 so they can continue to progress with the class.</i>
Module 5: Examples of Functions from Geometry (11 lessons)	Mission 5: Functions and Volume (18 lessons)
Module 6: Linear Functions (14 lessons)	Mission 6: Associations in Data (10 lessons)

**Module 7: Introduction to Irrational Numbers
Using Geometry**
(23 lessons)

**Mission 8: Pythagorean Theorem and Irrational
Numbers**
(15 lessons)
