

Navigating the Zearn Platform

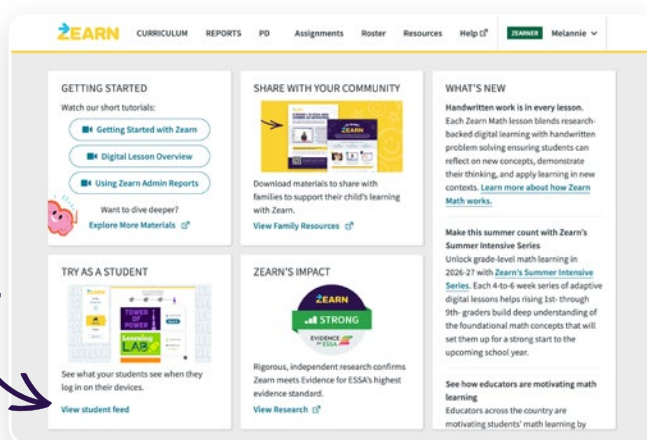

Preview our comprehensive suite of digital and print materials designed to support teachers with planning daily instruction that meets the needs of every student.

1

Log in at zearn.org.

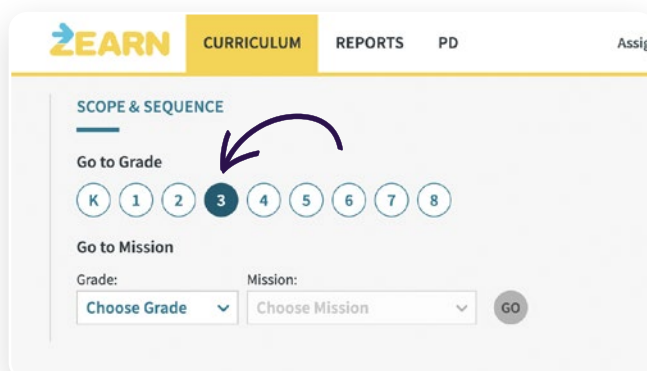

Zearn's platform offers **integration with Clever and Classlink** for easy sign on.

2

From the **Zearn Welcome Page**, use the navigation bar to find print and digital lesson materials, view reports and PD, set students' assignments, and more.

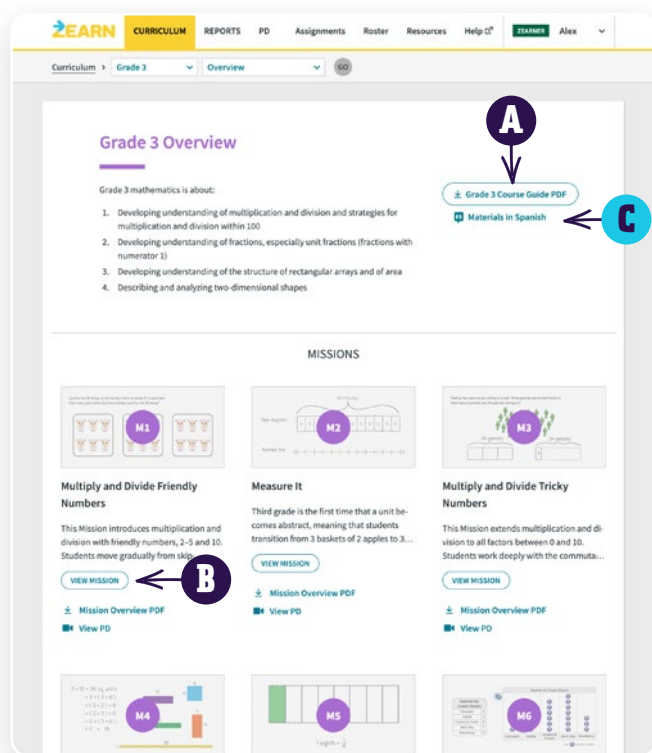

This view is only for teachers and administrators.
Students will login and get right to working on digital lessons. See firsthand what your students will experience by clicking "**View student feed**."

3

Click on the **Curriculum tab** to find flexible materials to support daily instruction, including daily lesson materials and independent digital lessons.

Select the grade you would like to view or use the dropdowns to navigate to a specific Mission. Each unit in Zearn Math is called a **Mission**.

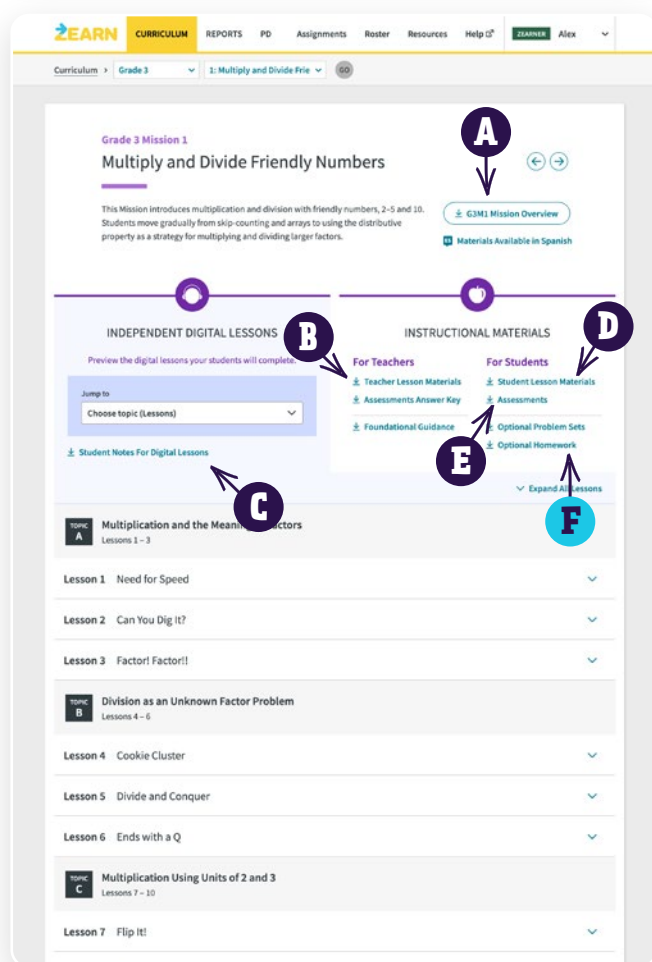

4

Each **Grade Overview** page provides a summary of the major work of the Grade.

- A** Download the **Grade Course Guide** to view the educative supports provided to help teachers address grade-level math standards—always with an appropriate balance of conceptual understanding, procedural fluency, and application.
- B** Select a **Mission** to download unit-level materials and preview the daily digital lessons students complete with Zearn.

C Click “**Materials in Spanish**” to view all available Spanish-language materials for every Mission of the grade.

5

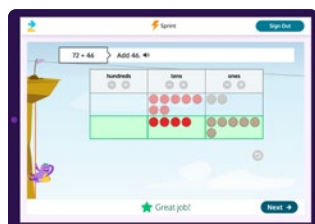

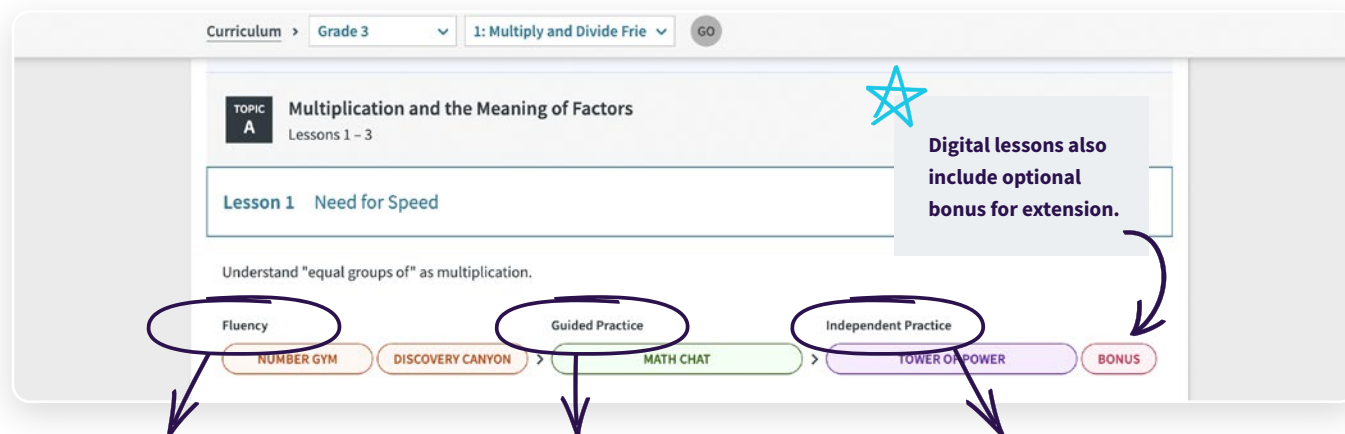

Explore every component of the Zearn Math Teacher Materials from each Mission page.

- A** Download the **Mission Overview** to review the learning goals of the Mission.
- B** Explore **Teacher Lesson Materials** to support daily instruction. Daily lesson materials support teachers to facilitate thoughtful mathematical discussions as students engage with rich visualizations and manipulatives, explore multiple ways to solve problems, and receive in-the-moment feedback from their teacher.
- C** View printed **Student Notes** that accompany every digital lesson.
- D** View **Student Lesson Materials** for students to use alongside teacher instruction.
- E** Download Mission-level **assessments**, as well as detailed **answer keys and rubrics**.

F Check out **additional resources** like bonus problem sets and guidance on connected foundational Missions.

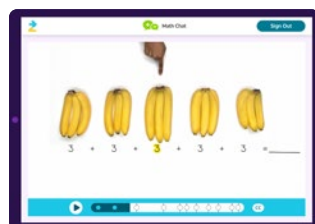

Scroll down to preview **Independent Digital Lessons** for every objective of the Mission. Click into a lesson to try each activity students will complete as a part of their independent learning. Be sure to make a few mistakes as you complete the lesson to see how students' receive supportive, in-the-moment feedback and built-in differentiated support.

This view is only for teachers and administrators to review digital content.
Students will log in and automatically progress from activity to activity.

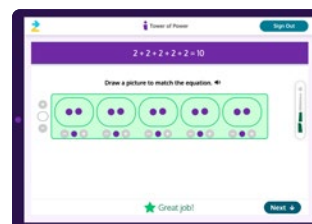

Fluency Activities

Individually adaptive and lesson-aligned activities help students develop the foundations for new learning.

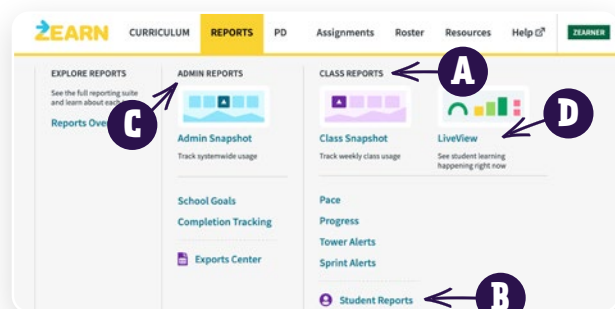

Guided Practice

Students explore new math concepts with built-in learning acceleration supports, including scaffolded access points that help students engage with new grade-level ideas.

Independent Practice

A daily formative assessment checks for understanding and launches adaptive supports that bring connected foundational concepts right into the context of grade-level learning.

Click on the **Reports** tab to see the comprehensive progress monitoring Zearn offers to help teachers differentiate instruction and give administrators visibility into system-wide learning.

A Class reports help teachers track students' progress to completing 3+ lessons each week and provide real-time alerts when students need more support.

B Student reports give teachers insight into each student's precise learning needs.

C Admin reports provide leaders with transparent progress monitoring at every level of your system.

D LiveView reports gives teachers real-time visibility into student activity so they can monitor engagement, encourage focus, and provide support in the moment.
